Imagine Pediatrics Achieves HITRUST e1 Certification Demonstrating Fundamental Cybersecurity Practices

HITRUST e1 Certification validates Imagine Pediatrics is committed to foundational cybersecurity controls and information risk management

NASHVILLE, TN – November 19, 2025 – [Imagine Pediatrics](#), one of the nation’s largest pediatric medical groups delivering 24/7 integrated virtual and in-home care for children with special health care needs, today announced its technology platform has again earned certified status by HITRUST for foundational cybersecurity.

HITRUST e1 Certification demonstrates that the organization’s technology platform is focused on the most critical controls to demonstrate that essential cybersecurity hygiene is in place. The e1 assessment is one of three progressive HITRUST assessments that leverage the HITRUST Framework (HITRUST CSF) to prescribe cyber threat adaptive controls that are appropriate for each assurance type.

“Earning HITRUST e1 Certification affirms our commitment to safeguarding the sensitive information of the children and families we care for,” said Dr. Patricia Hayes, Chief Medical Officer for Imagine Pediatrics. “At Imagine Pediatrics, we know that trust is the foundation of every clinical interaction, and this certification demonstrates that we are increasing access to integrated and personalized care with security standards that honor the trust families place in us.”

“The HITRUST e1 Validated Assessment is a strong fit for cyber-conscious organizations like Imagine Pediatrics that are looking to establish foundational assurances and demonstrate ongoing due diligence in information security and privacy,” said Ryan Patrick, VP of Adoption at HITRUST. “We commend Imagine Pediatrics for their commitment to cybersecurity and congratulate them on successfully achieving their HITRUST e1 Certification.”

About Imagine Pediatrics

Imagine Pediatrics is a tech-enabled pediatric medical group that delivers 24/7 virtual and in-home care to children with special health care needs through value-based care arrangements. Its multidisciplinary care teams provide integrated medical, behavioral, and social care designed to expand access to specialized pediatric care for children with special health care needs. The result is fewer hospital stays, more safe days at home, better outcomes and experience for families.
