Imagine Pediatrics Achieves HITRUST i1 Certification Demonstrating Trust for Partners and Families

Independent validation that the Imagine Pediatrics data ecosystem safeguards the sensitive information of children, caregivers, providers, and health plans.

NASHVILLE, TN – [November 4, 2026] – Imagine Pediatrics, one of the nation's largest pediatric medical groups delivering 24/7 integrated virtual and in-home care for children with special health care needs, today announced its Imagine Pediatrics Ecosystem residing at Amazon Web Services US East has earned certified status from HITRUST for cybersecurity and information protection. The certification reflects a commitment to protecting the information families, providers, and health plans entrust to Imagine Pediatrics every day.

The HITRUST i1 Certification demonstrates that Imagine Pediatrics has met requirements defined by a leading cybersecurity assurance leader, confirming that strong controls are in place to protect sensitive data and manage risk effectively. For caregivers, that means peace of mind that their child's information is safe. For providers, it's a secure foundation for care. For health plans, it demonstrates a partner that protects member data with the same rigor it brings to clinical care.

Built on the HITRUST Assurance Program, this achievement reflects independent third-party testing, centralized quality assurance, and certification backed by HITRUST's Cyber Threat-Adaptive engine. These elements ensure continuous alignment with the latest threat intelligence and evolving standards across NIST, ISO, and OWASP.

"Families trust us with the most personal information there is, about their child's health, their home, and their daily lives, and they expect us to protect it as carefully as we care for them," said George Boghos, Chief Executive Officer at Imagine Pediatrics. "That trust is earned at every level, with every health plan, provider, and caregiver we work with, and it is earned in how we protect their data. Meeting a rigorous, independently validated standard like HITRUST i1 is one way we show that their trust is well placed. We will always hold ourselves to the highest standard for the information entrusted to us."

"The HITRUST i1 Certification is an important benchmark for cyber-aware organizations such as Imagine Pediatrics," said Ryan Patrick, EVP of TPRM Customer Solutions at HITRUST. "Earning HITRUST Certification reflects not only the effective implementation of security controls, but also the organization's commitment to maintaining operational maturity across its cybersecurity program. We congratulate Imagine Pediatrics on this significant achievement."

About Imagine Pediatrics
Imagine Pediatrics is a tech-enabled pediatric medical group that delivers 24/7 virtual and in-home care to children with special health care needs through value-based care arrangements. Its multidisciplinary care teams provide integrated medical, behavioral, and social care designed to expand access to specialized pediatric care for children with special health care needs. The result is fewer hospital stays, more safe days at home, better

outcomes and experience for families. Learn more at www.imaginepediatrics.org and follow us on Facebook, Twitter, Instagram, and LinkedIn.
